Yafiet Araya

Dallas, Texas 75243 | 6418191508 | yafietweldegabir@gmail.com | yafietweldegabir.github.io|
linkedin.com/in/yafiet-weldegabir/

Software Engineer

Experienced Full Stack Java Developer with 7+ years of expertise in building high-performing backend and full-stack applications. Adept at leveraging Java features, design patterns, and best practices, with proficiency in frameworks such as Spring Boot and React. Proven ability to deliver exceptional solutions for top-tier financial institutions like Morgan Stanley and Goldman Sachs through Infosys Limited. Skilled in working with various databases, cloud platforms (GCP &AWS), and developing secure, scalable applications using OAuth and JWT. Proficient in CI/CD practices and tools such ensuring rapid and reliable software delivery. Strong experience in project management, agile methodologies, and the software development lifecycle, ensuring high-quality code and efficient team collaboration.

Technical Proficiencies

Languages – Java 17+, JavaScript, Python
Web Services - RESTful, Microservices, Reactive Programming, JSON, SOAP
Application Servers - Apache, Tomcat, Netty
Web Development- HTML, CSS, jQuery, React, JSP, JSF, Redux, Node.js, AJAX, Express.JS, XML
Databases - Oracle, MySQL, MongoDB, PostgreSQL, Couchbase
Frameworks - Spring Boot, Express, Node.js, Hibernate, Mocha, JUnit, Mockito, Liferay Portal
Design Patterns - Singleton, Prototype, Factory, Façade, MVC, Singleton, Facade, Command Strategy, Template Method, Observer, Decorator, State Pattern
AWS - EC2, ECS, EKS, ECS Fargate, ELB, EBS, S3, Cloud Front, VPC, IAM, SQS, SNS, Lambda, Cloud Watch, API Gateway, Aurora, Route53, Kinesis, Cloud Formation, Elastic Beanstalk, Autoscaling, RDS, DynamoDB, Aurora
Architecture – Microservices, Monolithic, SOA, Layered, Event Sourcing, Serverless, DDD, Event-Driven, Distributed Systems, Scalable and Resilient System Design & Containerization and Orchestration
Tools - Docker, Kubernetes, GCP, VS Code, Eclipse, IntelliJ, PyCharm, Postman, Maven, Kafka, Jenkins, Git, RabbitMQ, Keycloak, Splunk, PagerDuty, ELK, GitHub, JWT, OAuth 2, Prometheus, Star UML, Zipkin, Sleuth, RabbitMQ, ActiveMQ, Apache Camel, Karate Testing Framework

Professional Experience

INFOSYS (Goldman Sachs & Morgan Stanley)
Dallas, Texas 06/2022-Present
Software Engineer

- Spearheaded the development of high-performance backend and full-stack applications utilizing Java, Spring Boot, resulting in a 30% increase in application efficiency.
- Demonstrated proficiency in Java 8+ features, design patterns, and best practices, enhancing code quality and maintainability.
- Architected and optimized databases, including PostgreSQL and MongoDB, improving data retrieval speed by 25%.

- Implemented comprehensive cloud solutions on GCP, including GCS, Apigee, Artifact Registry, Container Registry, and GKE, and integrated AWS and Azure services for robust cloud infrastructure.
- Designed and consumed RESTful APIs, enabling seamless and scalable system integrations.
- Employed Bitbucket for version control, leading to a 40% reduction in code conflicts and streamlined collaboration.
- Utilized JUnit, Mockito, and Spring Testing frameworks for rigorous application testing, achieving 99% test coverage.
- Enhanced application security by implementing OAuth and JWT for authentication.
- Leveraged AWS services such as Lambda, S3, ECS, and API Gateway, contributing to a 20% reduction in operational costs.

Snorkel AI | *March 2026 – Present(Contract)*

Software Engineer / AI Data Engineer

- **AI Data Development & Model Programmatic Labeling:** Leveraged Snorkel's programmatic data labeling and weakly supervised learning platform to build high-quality training datasets, optimizing LLM fine-tuning pipelines and accelerating data iteration cycles.
- **Backend Integration & Microservices:** Engineered scalable Java/Spring Boot backend microservices and RESTful APIs to integrate machine learning and programmatic labeling workflows into existing enterprise data pipelines.
- **Data Engineering & Performance Optimization:** Architected distributed data processing workflows using Python, SQL, and cloud infrastructure (GCP/AWS), improving training data ingestion speeds and dataset accuracy.

LIYA Enterprise, May 2020 – April 2021 & March 2014 – August 2016
Asmara, Eritrea
Software Engineer

- Led the design and development of custom web applications using Java and Spring Boot, resulting in a 35% improvement in client satisfaction.
- Applied Test-Driven Development (TDD) methodologies, increasing code reliability and reducing bugs by 50%.
- Administered and optimized databases, ensuring high performance, integrity, and security.
- Implemented Agile, Scrum, and Waterfall methodologies to enhance project delivery and team collaboration.
- Developed and deployed RESTful web services using Spring MVC, improving API response times by 20%.
- Conducted server-side development with JSP and Servlets, enhancing application functionality.
- Integrated AWS services, including Lambda, S3, ECS, and API Gateway, to create scalable solutions.

EDUCATION

- **Master of Science in Computer Science |** Maharishi International University, Fairfield, Iowa 2026

- **Bachelor of Science in IT Networking and Security**, Zayed University, Abu Dhabi, United Arab Emirates 2020

Professional Development

- GCP Associate Cloud Engineer - Google Cloud Certification(2023)
- Certificate of Completion, CCNA Routing and Switching (2020)
- ILM Level 2 Leadership Certification (2020)
- AWS Fundamentals (2020)
- Introduction to Machine Learning, Samsung (2020)
- Certificate of Completion, Cisco CCNA IT Essentials (2017)
- Certificate of Completion, Cisco CCNA Routing and Switching (2017)
